

Plan world-class dental care in Thailand

Dental Tour AI is your travel concierge for dental care in Thailand. We are not a medical or dental provider — we handle the logistics (clinic introductions, translation, travel and on-the-ground support) so you can make your own informed choice with the licensed clinic.

1 Browse vetted clinics [/clinics](#)

Every clinic on the site has been checked and verified by our team — you only see the ones we trust. Compare locations across Bangkok, Phuket and Chiang Mai.

2 See your real savings [/savings](#)

Use the savings calculator to compare the full cost — treatment, flights and stay — against home-country prices. Travellers commonly save up to ~70%. All prices are indicative and confirmed by the clinic.

3 Talk to any clinic in your language [/translate](#)

The live translator speaks the world's most-used languages — type or speak, and hear the reply read back. Use it in calls, chats and at the clinic.

4 Plan your trip with AI [/planner](#)

Get a day-by-day AI itinerary — arrival, consultation, treatment, recovery and light leisure — with an indicative cost breakdown. The AI concierge chat answers travel and cost questions 24/7.

5 Book a free consultation [/book](#)

When you're ready, request a free consultation with a vetted clinic — or a written cost estimate at [/quote](#). A real person replies within 24 hours. No pressure, ever.

We are a travel concierge, not a medical provider

Dental Tour AI never gives medical or dental advice. All prices are indicative and are confirmed by the licensed clinic after a consultation. Every clinical decision rests with you and the licensed clinic.
